

Date Prepared: February 1, 2017

1. **Product and Company Identification**

Jet-Lube LLC / Deacon
Bldg. #1, West Point Drive
Washington, PA 15301 USA
Phone (724) 225-8008

24 Hour Emergency Response Contact:
CHEMTREC (USA and CANADA)
Phone: 800-424-9300 or 703-527-3887

Product Name: Deacon 420 Part Two
 Product Type: Two Part Rubber
 Product Description: Thin paste
 General Use : Injectable Rubber Sealant

2. **Hazards Identification**

GHS Classification :

Acute Toxicity, ingestion 4
 Repr. 2
 Skin Irritant 2
 Eye Irritant 2

GHS Label Elements :

Signal Word : Warning

Hazard Statements:

H302 Harmful if swallowed
 H315 Causes skin irritation
 H320 Causes eye irritation
 H335 May cause respiratory irritation
 H361 Suspected of damaging fertility of the unborn child: Evidence of birth defects (teratogenicity) in laboratory animals at maternally toxic doses. <.1% of mixture

Precautionary Statements :

P261 Avoid breathing vapors
 P262 Do not get in eyes, on skin, or on clothing
 P285 In case of inadequate ventilation wear respiratory protection
 P281 Use personal protective equipment as required
 P301/P310 If Swallowed: Immediately call a Poison Center or Physician
 P333/P313 If skin irritation develops: Get medical attention.
 P302/P352 If on skin: Wash with plenty of soap and water
 P305/P351/P338 If in eyes : Rinse cautiously with water for 15 minutes.
 Remove contact lenses if easy to do. Continue Rinsing.
 P337/P313 If eye irritation persists: Get medical attention
 P342/P311 If experiencing respiratory symptoms: Get medical attention.
 P233 Keep container tightly closed
 P501 Dispose of observing all Federal, State and Local regulations.

NOTE: THIS PRODUCT IN ITS PURCHASED FORM DOES NOT PRESENT AN INHALATION HAZARD FROM DUST, AS IT IS A PASTE, DUST IS NOT AIRBORN UNDER NORMAL HANDLING.

3. Composition / Information on Ingredients

Ingredients	CAS No.	% by weight
Dimethylbis[(1-oxoneodecyl)oxy]stannane	68928-76-7	1-10
Cobalt Aluminate Blue Spinel	1345-16-0	<.1
Polydimethylsiloxane	63148-62-9	50-90
Calcium carbonate	471-34-1	1-35

4. First Aid Measures

- Ingestion: DO NOT INGEST. If irritation or discomfort occur, obtain medical advice.
- Inhalation: if symptoms are experienced, remove victim to fresh air. If symptoms persist, seek medical attention.
- Skin Contact: no health affects expected. If irritation does occur, flush with lukewarm, gently flowing water for 5 minutes. If irritation persists, obtain medical advice.
- Eye Contact: If irritation does occur, flush eyes with lukewarm, gently flowing water for 5 minutes. If symptoms persist, seek medical attention.

5. Fire Fighting Measures

Recommended Extinguishing Agent:

Foam, Dry Chemical, Carbon Dioxide, Water Fog

Special Fire Fighting Procedures:

Self contained breathing apparatus and protective clothing should be worn in fighting fires involving chemicals. (Professionally Trained Personnel).

Hazardous Products Formed by Fire or Thermal Decomposition:

Thermal breakdown during a fire can evolve the following decomposition products: Silicon Dioxide, Formaldehyde, Metal Oxides, Nitrogen Oxides

Unusual Fire or Explosion Hazards: None

Compressed Gases: None

Pressure at Room Temperature: Does not apply

6. Accidental Release Measures

Steps to be taken in cases of spill or leak:

Wear proper personal protective equipment. Remove any sources of ignition from the area and allow hot surfaces to cool. Return uncontaminated material to container and seal container tightly. May present a slip hazard, clean up with a suitable absorbant. Dispose of contaminated material or waste.

7. Handling and Storage

Storage: Cool, dry, storage. Keep out of reach of children. Store in closed containers.

Handling: Avoid contact with skin and eyes. Do not breathe vapors, do not take internally. This product in its purchased form does not create an inhalation hazard from dust. If grinding or sanding or any other process is performed to this compound when cured, will cause airborne particles wear appropriate respirator to avoid breathing any dust or vapors. Wear appropriate safety gear as required in work area.

8. Exposure Controls / Personal Protection

Exposure Limits Ingredients	ACGIH (TLV)	OSHA (PEL)	OTHER
Dimethylbis[(1-oxoneodecyl)oxy]stannane (observe organic tin compounds limit)	0.1 mg/m ³ TWA (skin)	0.1 mg/m ³ TWA (skin) 0.2 mg/m ³ (STEL)	
Cobalt Aluminate Blue Spinel	10 mg/m ³ resp. particulate	15 mg/m ³ TWA total dust 5 mg/m ³ resp. fraction	
Polydimethylsiloxane	Not Established	Not Established	
Calcium carbonate		15 mg/m ³ TWA (Total Dust) 5 mg/m ³ TWA (Respirable fraction)	

Items below are not ingredients but possible by-products:

Formaldehyde (When heated to temperatures above 180 C in the presence of open air, product can form formaldehyde vapors.)

Formaldehyde is a potential cancer causer and a known skin and respiratory sensitizer.

Formaldehyde	1 ppm TWA	.75 ppm TWA 2 ppm STEL
--------------	-----------	---------------------------

Personal Protective Equipment (PPE)

Eyes: Safety Glasses
Full face shield recommended. (during injection process)

Skin: Chemical resistant gloves

Respiratory Protection: NIOSH approved air purifying respirator with an organic vapor cartridge or canister may be permissible under circumstances where airborne concentrations are expected to exceed exposure limits.

Other Protective Clothing or Equipment:

Coveralls or other protective clothing. Safety equipment as required in area.

Work / Hygienic Practices:

Avoid contact with skin and eyes. Avoid breathing vapors. Wash hands before eating.

Engineering Controls : Ventilation: Local exhaust if poorly ventilated area or in confined spaces.
General ventilation recommended.

NOTE: THIS PRODUCT IN ITS PURCHASED FORM DOES NOT PRESENT AN INHALATION HAZARD FROM OR DUST, AS IT IS A PASTE, DUST IS NOT AIRBORN UNDER NORMAL HANDLING.

9. Chemical and Physical Properties

Appearance: blue viscous liquid
Odor: slight odor
pH: 7.0 (cured rubber)
Solubility in Water: Insoluble
Specific Gravity: 1.1 (H₂O =1)
Evaporation Rate: Not Applicable
Boiling Point: Not Applicable
Melting Point: Not Applicable
Vapor Pressure: Not Applicable
Vapor Density: Not Established
VOC Content: None
Viscosity : 10,000 mPa's
Flash Point: >214⁰ F.

Flammable Limits:

LEL: Not Established
UEL: Not Established

10. Stability and Reactivity

Stability: Stable
Hazardous Polymerization: Will not occur
Hazardous Decomposition
Or By-Products: Thermal breakdown during a fire can evolve the following decomposition products:
Silicon Dioxide, Formaldehyde, Metal Oxides, Nitrogen Oxides
Incompatibility: Strong Oxidizers and Some Acids

11. Toxicology Information

Primary Routes of Entry: Inhalation and skin contact.
Signs and Symptoms of Overexposure: **Inhalation:** Irritates respiratory passages very slightly
Eyes: Direct contact may cause temporary redness and discomfort
Skin : Possible irritation
Ingestion: low ingestion hazard in normal use. Overexposure by ingestion
May injure the following organs: Thymus, Kidneys, Nervous System

Existing Conditions Aggravated
by Exposure: None Known

Carcinogenicity

NTP: None
IARC: Cobalt Aluminate Blue Spinel IARC, Group 2B Cobalt Compound
OSHA Regulated: NO

Toxicity : Developmental Toxicity: Dimethylbis[(1-oxoneodecyl)oxy]stannane <.1% of product mixture
Suspected of damaging fertility of the unborn child: Evidence of birth defects
(teratogenicity) in laboratory animals at maternally toxic doses.

Acute Health Hazards: **Skin:** Possible irritation.
Inhalation: Irritates respiratory passages very slightly
Eyes: Direct contact may cause temporary redness and discomfort

Chronic Health Hazards: **Ingestion:** low ingestion hazard in normal use. Overexposure by ingestion
may injure the following organs: Thymus, Kidneys, Nervous System

**NOTE: THIS PRODUCT IN ITS PURCHASED FORM DOES NOT PRESENT AN
INHALATION HAZARD FROM DUST, AS IT IS A PASTE,
DUST IS NOT AIRBORN UNDER NORMAL HANDLING.**

12. Ecological Information

Complete information is not available

13. Disposal Considerations

Recommended Methods of Disposal:
RCRA 40 CFR 261 Classification : This product as purchased does not fall under current US EPA RCRA
definitions of Hazardous Waste. It is recommended that this product in the purchased form be disposed
of as a hazardous waste. Certain state regulations could affect whether a material is considered a hazardous
waste upon disposal. It must also be noted that a material can become a hazardous waste if it is mixed
with or comes in contact with a hazardous substance during use. Under RCRA it is the responsibility of
user of a product to determine at the time of disposal, whether a material should be classified as a hazardous
waste.

14. Transport Information

DOT (49 CFR 172): Not Regulated

IATA : Not Regulated

Liquid / Solid (per ASTM D 4359-90) : Material is a Liquid

15. REGULATORY INFORMATION

CERCLA HAZARDOUS SUBSTANCES (40 CFR Part 302.4): Tetramethyl Thiuram Disulfide RQ 10

SARA TITLE III SECTION 302 EXTREMELY HAZARDOUS SUBSTANCES (40 CFR Part 355): This product does not contain any SARA 302 Extremely Hazardous Substances.

SARA TITLE III SECTION 311/312 HAZARDOUS CATEGORIZATION (40 CFR Part 370): Certain ingredients of this product are regulated under Sara Title III Section 311/312, see section 3 of this MSDS.

SARA TITLE III SECTION 313 (40 CFR Part 372): Cobalt Aluminate Blue Spinel <.1 % of product mixture

U.S. INVENTORY (TSCA): Any chemical substances (as defined in 40 CFR Part 710.2), that are contained in, or used in the manufacture of this product, are reported in the EPA TSCA Inventory. (As required per 40 CFR 710.3)

CALIFORNIA PROPOSITION 65: Formaldehyde (When heated to temperatures above 180 C in the presence of open air, product can form formaldehyde vapors.) THIS IS NOT AN INGREDIENT, BUT A POSSIBLE BY-PRODUCT

EUROPEAN UNION : Dimethylbis[(1-oxoneodecyl)oxy]stannane: CLP Acute Toxicity 4, Repr. 2, STOT RE 1
Cobalt Aluminate Blue Spinel : CLP STOT SE3, Skin Irritant 2, Eye irritant 2.
Calcium Carbonate : CLP Skin Irritant 2, Eye Damage 2
Polydimethylsiloxane : CLP Eye Irritant 2

Items below are not ingredients but possible by-products:

Formaldehyde (When heated to temperatures above 180 C in the presence of open air, product can form formaldehyde vapors.) : CLP Acute Tox 3, Carc.2,

CANADA WHMIS: Ingredient Disclosure List : : Formaldehyde (When heated to temperatures above 180 C in the presence of open air, product can form formaldehyde vapors.) THIS IS NOT AN INGREDIENT, BUT A POSSIBLE BY-PRODUCT

OZONE DEPLETERS: * This product is not manufactured with or contains any Class I or Class II Ozone Depleting Chemicals. (ODC's)

16. OTHER INFORMATION

The information contained in this MSDS sheet is based upon data supplied by our suppliers and data determined by us in our facilities at the time these products were formulated. We have reviewed any information that we received from sources outside our company. We believe that information to be correct but cannot guarantee its accuracy or completeness. Health and safety data in this sheet may not be adequate for all individuals and/or situations. It is the user's obligation to evaluate and use this product safely and to comply with all applicable laws and regulations. If after reviewing this MSDS you have determined that this product poses unusual risks to you, your plant, or your plant personnel, or if you cannot comply fully with all safety recommendations, do not use this product. This product is intended for a temporary repair. The responsibility for whether or not the product is suitable for use rest solely with the purchaser. We recommend that the product be tested prior to use. Your use of this information is beyond our control, therefore, the information is provided without warranty expressed or implied. We accept no liability beyond the purchase price of the material.

Estimated HMIS® Code:

Health Hazard:	1*	* See section 11 for chronic effects.
Flammability Hazard:	1	
Physical Hazard:	0	
Personal Protection:	NPCA recommends that PPE codes be determined by the employer, who is familiar with the actual conditions under which chemicals in the facility are used.	

Attn: Technician

(For industrial use by professionally trained personnel only) If being injected, steps should be taken to insure that the injection pressure in conjunction with pressure that may occur from gassing off of the compound does not exceed the pressure limitations of the piping system. If the compound is gassing off, gasses should be vented. Also, be aware it is quite common that the application temperature will exceed the compound flash point. Be aware of the possibility of a flash and take necessary precautions. See section 8 of SDS for personal protective equipment. Ventilation may be needed during heating/curing stage to exhaust organic vapors resulting from vaporization of certain organic agents. Always avoid direct contact with heated vapors being emitted from the compound. These vapors may be irritating to the skin, eyes and respiratory system. Read product technical data and safety information before use.
